OUR SWIMMERS	INDIVIDUAL PODIUMS	FASTER THAN ENTRY

Learning to race. Seeing progress.

Alongside 24 faster-than-entry swims, the report records 29 timed finishes from NT entries. Every swimmer has a result and a next step worth seeing.

TEAM STORY | MY RESULTS | NEXT GOALS

REAL PROGRESS. SHARED PRIDE.

A day to build on.

12 swimmers | 21 individual podium finishes | 63 timed finishes

24 faster swims + 29 NT-to-time finishes

24 of 32 comparable timed swims were faster than their listed entry seeds. Separately, 29 entries listed with NT produced valid times - useful benchmarks to build on, not measured time improvements.

Progress that belongs to the swimmer

Erin-Lee Brooks improved on all five of her seeded swims and earned five podium finishes. **Leo Chen** took 20.31 seconds off his 100m Freestyle entry and also reached five podiums. **Rudaviro Chivvanza** improved his 100m IM entry by 18.10 seconds.

New benchmarks. New confidence.

Marcel Goossens completed all eight of his NT entries with official times and five podium finishes. **Annie Tian** won her 100m Butterfly category from an NT entry. Across the team, 29 valid NT-to-time finishes give swimmers and coaches something concrete to work with next.

Six wins, with everyone included

The team recorded **6 first places, 10 second places and 5 third places** in the report's age categories. The story includes every swimmer, including those whose strongest moment was an improvement, a completed distance or a useful learning point rather than a podium.

The Cybersmart approach: make individual progress visible, celebrate effort alongside results and keep the next step clear. These cards bring each swimmer's official result, entry comparison and age-correct planning goal together.

Thank you to our swimmers, coaches and families for the commitment, encouragement, driving and timekeeping behind the day. Let's keep building together.

Faster = valid result faster than a listed entry time. NT = valid time from an entry listed NT. Podiums follow the official age categories. Hanwen's two results have no retained seed to compare.

KEEP THE NEXT STEP CLEAR

Results and next goals

Official results are SC | Qualifying reference is LC | Target: Level 2

Your result, in its proper context

The result is the official short-course time. The placing belongs to the exact age category printed in the CTA report, not the mixed heat, whole field or club. DQ wording is reproduced exactly; a DQ does not provide a valid timed result for a gap.

A fair comparison with entry

Faster/slower compares the result with the listed seed in the retained 27 October entry report. It is not proof of a historical PB. NT means no entry time was listed; a valid result is a benchmark, not a measured improvement or necessarily a first-ever time.

Two different target labels

LC QT is the official Level 2 long-course reference. Est. SC goal is an equal-points planning estimate: LC QT x (World Aquatics SC base / LC base), rounded down to 0.01s. It is not an official SSA conversion or a declaration of qualification.

Age at the championship, not only today

Targets use each swimmer's age on 5 April 2027, the retained Level 2 championship start. Ages 10 and younger use the 10 & Under table. Dates of birth remain private. This edition uses SSA v5 and the club QT Guide v3, rechecked 16 November.

100m IM and the wider pathway

100m IM has no direct Level 2 LC QT or LC equivalent. The Level 2 pathway also requires a 200m IM time on the SSA database; 100m IM does not replace it. Meeting a time target alone never confirms all entry requirements.

Official LEV2 tags versus our planning goal

Some results carry the report's LEV2 tag for its own age/course standards. We reproduce that tag unchanged. It is separate from the age-at-championship LC target and estimated SC goal shown on these cards.

About this edition

Results Edition v1 | Prepared 16 November 2026

Complete official results

CTA JL #5 (L1) - Various - 31/10/2026. Report issued 7 November 2026 at 20:45, received 16 November. All 69 Cybersmart rows were independently matched using text and spatial extraction. The separate all-club PDF is unchanged.

Entries and the additional swimmer

The retained Generations v2 entry report is dated 27 October: 11 swimmers and 67 entries. Every one is present in the results. Hanwen Zhang adds two official CYBE-CP results, giving 12 swimmers and 69 records. His seeds were not supplied and no comparisons are invented.

Venue scope

The original club guide identifies Generations Pool. The official results header says Various. This edition includes all official CYBE-CP rows from that report; it does not assign Hanwen's two additional swims to a venue that is not stated.

Counts you can trace

69 records = 63 valid timed finishes + 6 DQs; no Cybersmart NS rows. Of 32 timed swims with a listed seed, 24 are faster and 8 slower. Separately: 29 valid NT-to-time finishes and 2 timed results with no retained entry seed. 21 top-three finishes = 6 firsts + 10 seconds + 5 thirds.

Current targets and conversion limits

Current club QT Guide v3 and official SSA rules v5 (30 October 2026) were retrieved 16 November and byte-matched to the verified references. Level 2 values used here match the previous guide. World Aquatics September 2026 bases were also rechecked; the SC goal remains an analytical estimate, not an official SSA conversion.
